

**Subject:** Top clinical talent for addiction & mental health in NYC

Hey {First Name},

We've interviewed a wave of really strong clinical talent this week. Thought you might want a first look at them.

**Licensed Practical Nurse (LPN)**

6 years supporting patients in detox and residential recovery centers.

- Skilled in medication administration, vitals, and patient monitoring during withdrawal
- Known for calm presence and strong communication with both patients and families

**CASAC (Credentialed Alcoholism and Substance Abuse Counselor)**

4 years of experience in outpatient treatment programs.

- Leads individual and group counseling with a trauma-informed approach
- Experienced in intake assessments, treatment planning, and relapse prevention

Let me know if either profile looks like a fit. Happy to send more profiles if you're looking for someone specific.

Best,  
Andre

Hey {First Name},

Got two more great candidates that really stood out. Thought you might want to check them out.

**Registered Nurse (RN)**

7 years in mental health clinics and co-occurring disorder programs.

- Oversees medication regimens and coordinates with psychiatrists and case managers
- Strong background in de-escalation and crisis response

**Phlebotomist**

3 years working in outpatient MAT (Medication-Assisted Treatment) centers.

- Manages high-volume blood draws with excellent infection control standards
- Known for building trust with patients navigating early recovery

Let me know if either profile fits your current hiring goals. Happy to send resumes or set up a quick intro.

Hey {First Name},

Wanted to pass along two more strong clinicians available now.

**CASAC-T (Trainee)**

2 years in residential substance use programs.

- Co-facilitates group therapy and supports client goal tracking
- Experienced with EMR documentation and treatment compliance support

**Licensed Practical Nurse (LPN)**

5 years in inpatient dual-diagnosis units.

- Provides nursing care for patients with both psychiatric and substance use disorders
- Comfortable with behavioral health protocols and team-based care

Let me know if either profile looks like a fit. Happy to send over more details or explore similar options.

Hi {First Name},

Got two more candidates we'd recommend for mental health and recovery settings.

**Registered Nurse (RN)**

8 years in detox and stabilization units.

- Monitors withdrawal symptoms and adjusts care plans in coordination with MDs
- Experienced in patient education and medication-assisted treatment support

**Phlebotomist**

2 years working with mobile community-based recovery programs.

- Skilled in difficult draws and working with high-anxiety patient populations
- Strong communication and quick to adapt in field-based settings

Let me know if either sounds like a match. Happy to send additional options if you're hiring for other shifts or roles.

Hey {First Name},

Got a couple more strong candidates who've supported addiction care teams across NYC.

**CASAC**

6 years in methadone clinics and outpatient group therapy.

- Specializes in relapse prevention and structured goal setting
- Known for high patient engagement and collaborative treatment planning

**Licensed Practical Nurse (LPN)**

4 years in psychiatric emergency departments.

- Delivers nursing care for patients with acute mental health and substance use needs
- Strong in triage, patient safety, and team coordination

Let me know if either profile could support your team. Happy to send over resumes or explore related experience.

Best,

Andre
